The Netherlands

Zuiderzeehaven Kampen

General Information

Kampen has the potential to become an important economical harbour on the banks of the IJsselmeer.

The city of Kampen wanted to start with the construction of a second industrial harbour.

The future harbour is unique due to the fact that it will be able to accommodate inland barges, twin push-towing barges and coastal navigation vessels of up to 4000 ton and more.

Regionally the Zuiderzee harbour is very important in the area of the development of new industrial infrastructure for businesses, which require direct access to deeper waterways.

Project Description

- Development of a new harbour with a total surface of 63 ha, of which is 42.3 ha wet surface and 5 ha industrial area.
- Development structure: Public Private Partnership (PPP)
